

# Analyze YOUR Handwriting and Learn Your Personality!

I have a very fun, highly interactive presentation on **Handwriting Analysis!** I know this seems weird, but if there's a breakout session at a conference, or 30 minutes filler time in a general session, I can easily fit this in.

Using a pad of paper and a pen, each member of the audience analyzes their own handwriting during the presentation while learning key elements of their personality.

## Some of What You Learn

- Are you chatty?
- Are you secretive, keeping your “cards close to their vest?”
- Do you have attention to detail, or are you “big picture?”
- Do you just want to know the answer up front – the bottom line?
- When making decisions, do you focus on the facts or do you go with your gut?
- Do you lean toward love at first sight, or prefer to get to know someone for a while?
- Can you keep a secret?
- And there's much more!

Everyone is fascinated, loves learning about themselves, and it's definitely a crowd pleaser. If you want to bring a super fun activity to your event, I'm happy to add this to any program. Everyone will be talking about it and your event will be memorable. Food for thought!

## Who Should Attend

- Everyone!!!

This is a 30-minute highly interactive activity.
